Education

2022 to now	Krishna's Vikash Institute of Technology, Raipur Bachelor of Technology, Computer Science & Engineering Currently Pursuing (4 th year 8 th sem)	
2021	12 th (Senior Secondary Examination) Mahatma Gandhi College, Darbhanga (BSEB)	64.8%
2019	10 th (Secondary Examination) S.K.Y. High School, Phulparas, Madhubani, Bihar (BSEB)	62.8%

Internships & Trainings

Feb 2026 – Mar 2026	Software Development Intern Chepoint E-Learning & Cybersecurity Solutions Remote / Labpur, West Bengal • Developed a Ride Booking Mobile Application for Inaga LLC using Flutter and Firebase • Integrated Laravel backend APIs with mobile frontend • Implemented authentication, trip booking and ride tracking features • Worked with Next.js, React and Node.js in modern web stack • Integrated Firebase and Supabase for real-time database operations • Collaborated with development teams using Git and Agile workflow
Jul—Aug'24	Python Programming Intern, CodTech IT Solutions, Hyderabad • Successfully completed a 1-month internship focused on core Python programming • Worked on real-world projects involving data handling and logical problem-solving • Gained hands-on experience in writing Python scripts and understanding backend logic
Jun-Aug'25	Vocational Training in AI & Machine Learning, IIIT Naya Raipur • Built machine learning models using Scikit-learn • Implemented neural network models using TensorFlow • Achieved 92% model accuracy on classification tasks • Worked with real-world datasets for prediction and analysis

Academic Projects

Jan 2025 —July 2025	NoteDeck CV – AI Document Generator Flutter • Google Gemini AI • Firebase • Dart • Developed an AI-powered document generation platform using Groq API for intelligent content creation • Built features to generate study notes, PowerPoint presentations and professional resumes automatically • Implemented PDF and PPT export functionality for structured document output • Integrated Firebase Firestore for real-time data storage and synchronization • Generated 1000+ AI-powered documents through the platform
Sep 2025- Dec2025	Safety Alert App Flutter • Node.js • Firebase • Geolocator API

Dec-2025-Now

- Built an **emergency safety application** with SOS alert system
- Implemented **GPS location tracking with Google Maps link sharing**
- Backend developed using **Node.js**

ChetChat – Cross-Platform Messaging Ecosystem

Flutter | Firebase | Cloud Firestore | Dart

- Developed real-time messaging system with Firebase backend
- Implemented secure authentication and cross-device synchronization
- Designed scalable architecture for chat messaging features
- Live demo available at downloadcenterdevsanjit.netlify.app
